**Unit 4 Arianne Business
Centre, Blackburn Road,
Townsend Industrial
Estate, Houghton Regis,
Beds LU5 5DZ**

Robust and discreet in design, the Rapid Response Camera is ideal for quick deployment for a wide variety of applications including building sites, farms town centres, public events, car showrooms and garages.

The Rapid Deployment Domes are ideal for monitoring remote locations, particularly where the installation of permanent CCTV would prove difficult or prohibitively expensive.

The Dome unit only needs a single 240 volt power cable for operation.

Comes complete with an integrated 500Gb HDD.

On activation of alarm by the movement sensors it will send a signal to our central station via a built-in wireless LAN and 3G Router.

The sensors will send camera to pre-set positions

Above units can be purchased outright, through our lease buy package or can be hired on a monthly basis.
