

BACKGROUND

Colpac is a British designer and manufacturer of food packaging products, internationally renowned as a leader in innovative food packaging solutions. With a dedicated manufacturing plant and complex, difficult to replace machinery, CCTV and security was needed in and around the Flitwick based site.

SOLUTION

MJ Security responded quickly to Colpac's initial need and fitted an analogue system to cover the factory, offices and office exterior to include two car parking areas.

Colpac were delighted with the quality of service, professionalism and enthusiasm they received and further commissioned MJ Security. Subsequently, an updated system to IP was installed along with fitting and wiring of a new HIK Vision IP system and installation of 40 cameras.

RESULTS

After the initial analogue CCTV system was installed in 2006, MJ Security has continued to work with Colpac, offering advice, installation and maintenance of their security systems.

CHALLENGE

Colpac needed CCTV installed to cover their machinery and also their external car parks, to ensure the security and safety of both equipment and employees. Based in Bedfordshire, they approached MJ Security as another local business in the same area to help them.

BRIAN READER, TECHNICAL MANAGER FROM COLPAC, SAYS

"MJ Security provide us with the best security solutions. As a long established family run business, like ourselves, they provide first class customer service, high quality products and the trust that they always deliver and work in our best interests. We have used MJ Security for over 11 years and I wouldn't look anywhere else for security support."

MICK JAMES, MJ SECURITY FOUNDER, SAYS

"We enjoy working with Colpac and over the last 11 years we have not only installed their security systems but also provided annual maintenance. It is a pleasure working with a fellow family run, local business. We look forward to continuing to work with Colpac for many years to come."
